DISCOVER CLEANER, GREENER HEAT FOR YOUR HOME OR COMMERCIAL SPACE WITH INFRATECH INFRARED HEATERS.

[JULY 17, 2013] GARDENA, CA – There's nothing like the comfort and relaxation of outdoor living in the summer months. Now there's an environmentally friendly, energy-efficient way to enjoy the indoor-outdoor spaces in your home or commercial property all year round with Infratech infrared heating systems.

Infratech offers a complete line of eco-friendly infrared heating systems that can add comfort and sophistication to a wide range of residential and commercial environments like patios, terraces, verandas, enclosed areas, or any indoor or outdoor setting where heated air cannot be easily contained and re-circulated. Our heaters feature a medium wave quartz element that emits a safe, clean wavelength of light that is only absorbed by solid objects, transferring heat directly to a person, table or floor rather than heating the air. You'll enjoy radiant, comfortable heat that won't "blow away" in windy conditions, with a barely discernible, pleasing glow that will not affect the ambience of your gathering. These heaters offer silent operation without the harsh glare or bright-colored light of competitive halogen or short-wave heaters, and without the harmful emissions, odors or negative environmental effects created by gas heaters or outdoor fireplaces. Not only are Infratech heaters over 90% energy efficient and UL listed for outdoor and indoor use, they are also easy and inexpensive to operate.

Whether you're outfitting a terrace in your home or seeking a versatile heating solution for a large commercial property, Infratech offers a wide range of standard and customized design and control capabilities to suit the needs of your space. These low-profile electric heaters coordinate with many décor styles, to bring casual comfort to upscale restaurants, hospitality and retail establishments, fine homes and more. They are available in a variety of color and finish options, and can be mounted to trellis beams, tucked beneath awnings or built directly onto a ceiling or wall; flush mount options and optional custom colors allow the heaters to blend seamlessly into the surrounding environment. We also offer control options that range from simple systems with on/off switches to comprehensive custom controls that can be integrated into a home management system. In addition to our line of comfort heating products, we also offer automotive and industrial heating and curing systems.

Now you can learn more about Infratech heating systems and get tips and tricks to help you enjoy outdoor living to the fullest by staying updated with us on Facebook, Twitter, YouTube, Pinterest and Instagram. Whether you're looking for recipes, design tips or fun suggestions for your home, or are eager to learn about our newest offerings for commercial, retail or residential development projects, you'll find it here.
