ECO COMFORT MEETS ECLECTIC DESIGN. INFRATECH HEATERS AT THE NEW ACE HOTEL, IN DOWNTOWN LOS ANGELES.

[APRIL 30, 2014] GARDENA, CA – One of Los Angeles’ coolest spots just got a little more comfortable. In early 2014, the trendsetting Ace Hotel hospitality chain opened one of its newest locations in the historic United Artists Building in downtown LA.

Built in 1927, the ornate building incorporates Spanish and Moorish-inspired architectural influences inside and out, and houses the United Artists Theater, first used for the United Artists motion picture studio. Today, the 12-story, 180-room hotel has been given a contemporary-eclectic update by Commune, an all-star design collective that also worked on the Ace Hotel & Swim Club in Palm Springs. The hotel’s hip, high-end decor incorporates custom designs in furniture, ceramics, textile wall hangings, lighting and more in its rooms and communal spaces.

When it comes to climate control, Commune opted to implement Infratech ceiling-mounted Slimline infrared heaters in the hotel’s LA Chapter brasserie and Upstairs rooftop lounge. These low-profile heaters add environmentally friendly, ambient warmth to both the indoor-outdoor lounge area and cavernous restaurant, without drawing attention away from striking ceiling treatments, lighting or views.

INFRATECH SLIMLINE HEATERS

ABOUT INFRATECH

Infratech has been a pioneer and leader in infrared technology for more than 50 years. We offer a wide range of infrared heating products that bring casual comfort to upscale restaurants, hospitality and retail establishments, as well as private homes. We also provide a line of heating products for automotive curing and industrial/commercial heat applications. We use the latest in manufacturing technologies to offer customers the most efficient infrared systems for the lowest cost in the industry. Infratech is committed to providing high quality, innovative products that exceed our customers’ expectations. All of our products are proudly made in the USA.
