

EXTEND THE OUTDOOR LIVING SEASON WITH INFRATECH INFRARED HEATERS FOR THE HOME.

[OCTOBER 31, 2013] GARDENA, CA – Cool, crisp afternoons. Brilliant foliage. Have you ever wished you could enjoy more time outside in the autumn? Now you can. With an Infratech infrared heating system, you can extend the outdoor living season by months – or even year-round, in warmer climates. If you’ve ever wanted to sip cocktails under a harvest moon, move the game day tailgate party outside, or even enjoy Thanksgiving dinner on the terrace in comfort and convenience, you may want to consider incorporating an Infratech heating system into your outdoor living space.

Infratech heaters offer environmentally friendly, energy-efficient heat and silent operation, without the harmful emissions, odors or negative environmental effects created by gas heaters or outdoor fireplaces. This means you can enjoy the changing seasons without impacting the environment or running up your energy bill. They’re the perfect way to get more use out of indoor-outdoor spaces like patios, terraces, verandas, enclosed areas, or any indoor/outdoor setting where heated air cannot be easily contained and re-circulated. Better still, they’re available in a wide range of color and finish options, and can be built directly into a ceiling or wall, mounted to trellis beams, tucked beneath awnings, pole mounted and more, to blend seamlessly into your décor.

If you’d like to learn more about Infratech heating systems and get tips and tricks to help you enjoy outdoor living to the fullest, stay updated with us on our social media pages. Whether you’re looking for recipes, design tips or fun suggestions for your home, or are eager to learn about our newest offerings for commercial, retail or residential development projects, you’ll find it here.
